

Phil Badger is a Master Model Railroader (MMR) recognized by the National Model Railroad Association (NMRA). The title of MMR is prestigious and not easily achieved.

Phil Badger owns his own company: Gopher Models and Badger Bits. Gopher Models and BadgerBits is a manufacturer of its own products but we can also supply Kato models on special order.

Phil is a long-time Member of the Australian Region.

Phil has been at the forefront of Australian N Scale starting essentially with the Richmond layout. He has worked with the likes of Peter Boorman, and others, on various projects over the years.

After he finished the Richmond layout, he built a small Thomas the Tank Engine layout he created using hand-laid code 40 track and custom built locos and rolling stock complete with faces!
